

NexaMart Regional Compliance & Operational Boundaries

Version: 1.8 | Effective Date: Q1 2026

Objective

To enforce geographic compliance, tax handling rules, and local operational constraints across operating regions (North, South, East, West, Central).

Regional Operational Boundaries

- Cross-Regional Fulfillment: Inter-region inventory transfers are subject to regional shipping lead-time caps and local tax jurisdiction validation.
- North & West Hubs: High-density zones operating under automated tier-1 fulfillment schedules; standard delivery windows cannot exceed 48 hours.
- South & East Hubs: Subject to regional transit variances; safety stock thresholds in these zones are increased by an additional 10% to absorb logistics delays.

Compliance and Exceptions

- Any regional price adjustments or localized promotional rollouts must comply with local consumer protection statutes and regional tax codes before system activation.
